

CYBER CRIME PREVENTION

Protecting RPM

THE GROWING RISK OF CYBER CRIME

- Cyber-crime is the fastest growing crime globally, ranking 3rd in the World behind Government Corruption and Narcotics.
- The estimated global cost of cyber security attacks in 2015 was \$400 billion.
- The projected cost in 2019 was estimated to be in excess of a \$1 trillion.
- Intellectual Property theft makes up at least a quarter of the cost of Cybercrime.

COMMON EXAMPLES OF CYBER CRIME

- Phishing is where the fraudster will send out a legitimate looking email attempting to trick the employee into providing data.
- Hacking is when a criminal uses technology to gain access into an individual or company account to gain unauthorized access to information and system for their personal gain.
- Malware attacks are targeted to steal data from the business.
- Ransomware attacks will demand a payment from the business to allow access back to the system and data.

CYBER CRIME RISK AREAS

- Personal information requests.
- Intellectual Property information requests.
- Payroll information.
- Customer and supplier account information.
- Wire fraud - Bank detail changes.
